<input type="radio"/> BLACK	Textured Black

* Custom colors based on the international RAL Color System are available with a lightly textured semi-gloss finish. Specify the color by the four digit RAL number. Example: RAL 8017

Plant Hanger Specification

Structure

The clam shell clamps to the pole shaft with four 5/16-18 stainless steel, button head bolts. The inside surfaces of the clam shells are lined with silicone pads to protect the pole and provide a tight, non slip fit. The clam shells are cast aluminum. The arm is 1.50" (150mm) diameter, .25" (6mm) wall tube. The two capture rings are .25" (6mm) with a 1/4-20 stainless steel bolt used to capture the hanger.

Finish

Polyester powder coat textured finish. Available in three standard colors or RAL colors. The exterior grade, UV-resistant finish provides excellent salt spray resistance according to ASTM B117 testing procedures.

Warranty

The product is warranted to be free from manufacturing defects for three years from the date of shipment.
